Correction to the F3N Optional Manoeuvre B.1 in the 2013 Edition of the Sporting Code

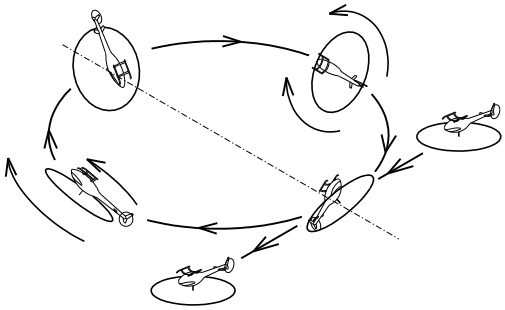
F3N Optional Manoeuvre B.1 should read:

B.1 Two opposite pirofunnels. K-factor = 10

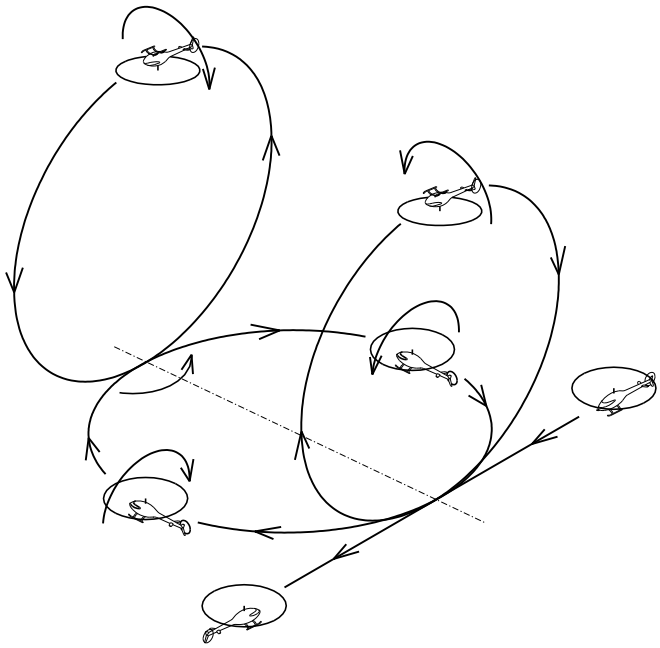
MA enters in inverted flight and performs a quarter pirouette. When it crosses the centreline it enters a funnel with the tail pointing to the circle centre and starts pirouetting in a way, that after each quarter circle the fuselage has changed its direction about 180° (model starts nose to the judges, after a quarter circle the tail points to the judges, after a half circle the nose again, after 3 quarters the tail and after the circle the nose again). After one funnel the pirouetting direction is changed and a second funnel follows with the same conditions for the pirouette. After the second funnel MA exits the manoeuvre with a quarter pirouette to inverted flight.

The diagram appears on page 2.

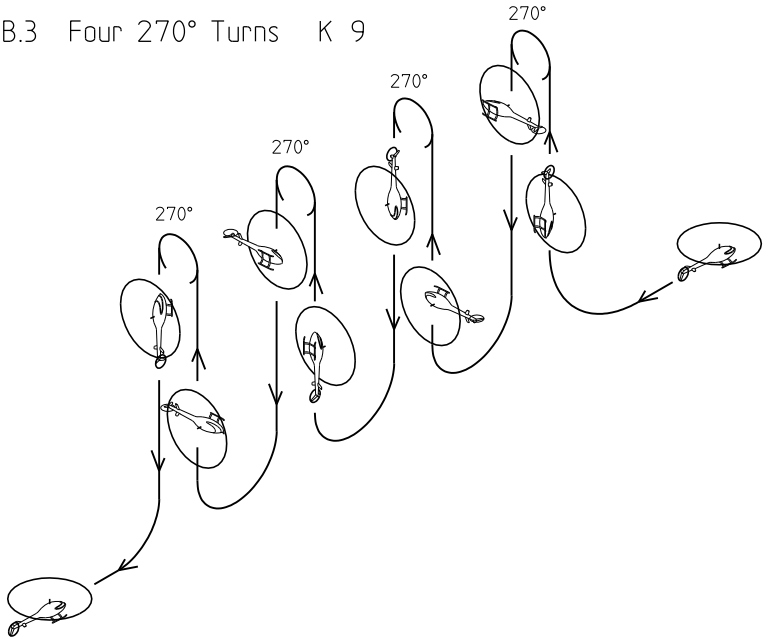
B.1 Two opposite pirofunnels K 10



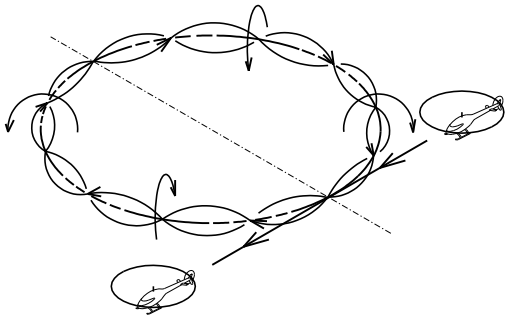
B.2 Rolling combination K 10



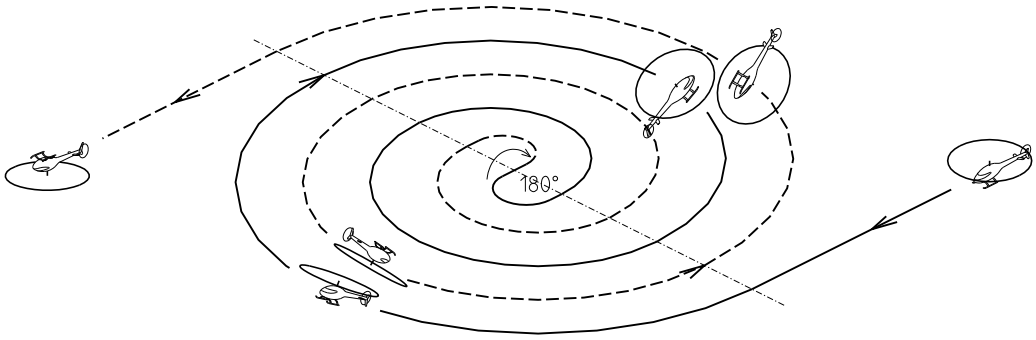
B.3 Four 270° Turns K 9

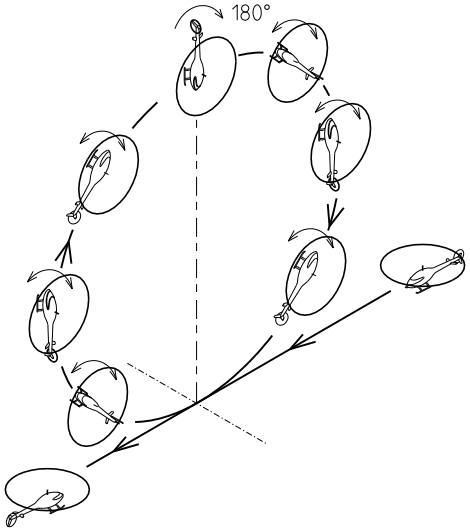


B.4 Rolling circle reversal K 10



B.5 Galaxy K 10,5





B.6 Tic-toc loop with half pirouette K 9
