

Report of New Technology Expert Group

As of June 30th 2014

NEW TECHNOLOGY EXPERT GROUP (ITEG)

The FAI Head Office is currently working on a possibility to partner with Flarm Technologies, a Swiss based company, to provide live tracking on all FAI disciplines. This is directly within New Technology EG's set task. HO is working on a presentation on this matter which it will circulate to the EG for input.

I would also like to suggest that the point of contact for the New Technology EG would be changed to Mark André, the CIA technical expert.
