

# IPC JURY NOTICE

## 6<sup>TH</sup> FAI World Canopy Piloting Championships Farnham - Canada

IPC Jury Meeting No: # 04

Time and Date: 09.45 hours, August 25<sup>th</sup>, 2016

Subject: request from the IPC President to handle a request from the organizer to change the competition schedule as per bulletin #2 from: "26 August 2016 (Friday) – Last Competition Jump will take off at 15:00" to "26 August 2016 (Friday) – Last Competition Jump will take off no later than 17:00". This due to weather conditions.

### Deliberations:

1. It is unknown if any competitors have travel arrangements such that extending the schedule would disallow them to compete. So, if any competitor would be in such a position by the time extension this would not be acceptable. Therefore, a written approval **must** be received by the Meet Director from **all** head of delegations, or in the case of absence of a head of delegation **all** the competitors concerned, that they agree with the time extension and that this cannot be ground for a protest.
2. At time of the request, only one round of speed event was completed. As such a valid speed event is there. Extending the schedule and doing another speed round could (and most likely would) change the current standings. A competitor in a current medal position could therefore lose this medal, which is not acceptable. Therefore, the extension can only be given if the current speed standings do not change because of this. In order to accomplish that, the program of the competition must be so that – from the time that the extension has been given – round 2 will be a distance round (or a zone accuracy) and round 3 will be a zone accuracy round (or a distance) After round 2 and 3, the program is up to the Meet Director, but under no circumstance can any speed round be made before 3 rounds of distance and 3 rounds of zone accuracy have been completed in full.

### Decision:

The Jury approves the request from the organizer, with the above mentioned provisos of the written approvals and the program restriction.
